

## 1. Introduction

**Purpose:** This document outlines the functional and non-functional requirements of the system.

### 1.1 Scope

The system will provide the following key features:

- User authentication and authorization
- Real-time data synchronization
- Customizable reporting

### 1.2 Key Requirements

1. Users must be able to register and log in securely.
2. The system must support multiple user roles.

**Purpose:** This document outlines the functional and non-functional requirements of the system.

### 1.1 Scope

The system will provide the following key features:

- User authentication and authorization
- Real-time data synchronization
- Customizable reporting

### 1.2 Key Requirements

1. Users must be able to register and log in securely.
2. The system must support multiple user roles.

**Purpose:** This document outlines the functional and non-functional requirements of the system.

### 1.1 Scope

The system will provide the following key features:

- User authentication and authorization
- Real-time data synchronization
- Customizable reporting

### 1.2 Key Requirements

1. Users must be able to register and log in securely.
2. The system must support multiple user roles.

**Purpose:** This document outlines the functional and non-functional requirements of the system.

### 1.1 Scope

The system will provide the following key features:

- User authentication and authorization
- Real-time data synchronization
- Customizable reporting

### 1.2 Key Requirements

1. Users must be able to register and log in securely.
2. The system must support multiple user roles.

**Purpose:** This document outlines the functional and non-functional requirements of the system.

### 1.1 Scope

The system will provide the following key features:

- User authentication and authorization
- Real-time data synchronization
- Customizable reporting

### 1.2 Key Requirements

1. Users must be able to register and log in securely.
2. The system must support multiple user roles.

**Purpose:** This document outlines the functional and non-functional requirements of the system.

## 1.1 Scope

The system will provide the following key features:

- User authentication and authorization
- Real-time data synchronization
- Customizable reporting

## 1.2 Key Requirements

1. Users must be able to register and log in securely.
2. The system must support multiple user roles.

**Purpose:** This document outlines the functional and non-functional requirements of the system.

## 1.1 Scope

The system will provide the following key features:

- User authentication and authorization
- Real-time data synchronization
- Customizable reporting

## 1.2 Key Requirements

1. Users must be able to register and log in securely.
2. The system must support multiple user roles.

**Purpose:** This document outlines the functional and non-functional requirements of the system.

## 1.1 Scope

The system will provide the following key features:

- User authentication and authorization
- Real-time data synchronization
- Customizable reporting

## 1.2 Key Requirements

1. Users must be able to register and log in securely.
2. The system must support multiple user roles.

**Purpose:** This document outlines the functional and non-functional requirements of the system.

## 1.1 Scope

The system will provide the following key features:

- User authentication and authorization
- Real-time data synchronization
- Customizable reporting

## 1.2 Key Requirements

1. Users must be able to register and log in securely.
2. The system must support multiple user roles.

**Purpose:** This document outlines the functional and non-functional requirements of the system.

## 1.1 Scope

The system will provide the following key features:

- User authentication and authorization
- Real-time data synchronization
- Customizable reporting

## 1.2 Key Requirements

1. Users must be able to register and log in securely.
2. The system must support multiple user roles.
